

Risk Management Platform

Travel Eye Website Enhancements Include:

A secure, web-based system for tracking global threats and receiving location-based risk intelligence including:

- » **Language Customization:** 8 different languages are offered (English, German, French, Italian, Spanish, Japanese, Portuguese, Chinese).
- » **Mobile App:** The Travel Eye App for IOS and Android (Play Store or App Store) offers the same functionalities as the desktop platform.
- » **Emergency Button:** In critical situations, the traveler can push the button and will be automatically connected with the AXA Operation Center to start a case.
- » **Push Alerts:** Global Events Section allows you to set countries as favorites and includes the option to receive event alerts by email based upon impact level.

Travel Eye Website Features Include:

- » **Risk Map:** Allows you to zoom down into governorates and provinces, cities, and city districts revealing different risk ratings and events. A heat map can be activated to show hot spots of risk in different locations.
- » **Global Events Section:** Provides an overview of security and medical events worldwide and includes visualization by list, charts, and map view. Searches can be filtered by country and type of event.
- » **Country Risks Section:** Provides a risk portfolio by country including key categories of crime, civil unrest, terrorism, general risks and governance. Information can be exported into a pdf report.
- » **Enhanced Medical Provider Search:** See facility and specialist locations visualized on a map, and ability to set your search based upon different locations within a city.
- » **Location Intel:** Easy access to WorldCue site powered by our security partners, WorldAware. WorldCue offers detailed trip, security, and medical briefs by country and select cities, as well as intel surrounding world events. Location reports allow users to create location-specific intelligence reports for 180 countries and 275 cities in 10 threat domains.
